# CASE STUDY

Happy Land Kids Club - Layout

## Role within the project;

Design by  
Global Attractions Ltd (GA)  
in conjunction with Arvenchi Design

Completed June 2019  
Full concept, 260 sqm of activities

## General Project Description;

The project is an indoor playground composed by two separated structures into Happyland Center. The main and bigger structure has several play elements and climbing activities for children and two spiral slides and two drop slides that ends into a huge ball pool and ground floor. Into the playground is presents also a cannon area. The second and smaller structure, tower shape, thought for the younger kid is surrounded by a whale body shape with a spiral slide that ends into a sand pool.
